Moths Are Coming!!

"Hot Weather" is just around the corner and that means it's time to have your Winter Clothes Thoroughly Cleaned

And put in air-tight Moth-Proof Bags. It takes MORE than just dipping your clothes in cleaning fluid to kill moths. They should be thoroughly cleaned and then deodorized at a temperature of about 190 degrees. Sometimes your clothes have to be "spotted" with different kinds of chemicals

to remove all the spots that are safe to remove. We are equipped to do this work and solicit your business. We are as close to you as your telephone. One of our trucks is in Elba all the time picking up and delivering clothes and one of our trucks serves the surrounding territory every day in the week.

### "Moth-Proofed"

Having your clothes "Moth-Proofed" costs no more than regular cleaning, and a very small cost for the Moth Bag-often it saves the price of a new suit, dress or coat.

We hope to have the privilege of serving you.

There is no other statement of fact (for it is more than a promise) anywhere or by anyone that can compare with the assurance of Christ that He is with His witnesses always, even unto the end of the age.

Consider first of all who is to be with us, namely, the Son of God, the risen Christ, the One with all authority in heaven and earth! Then note that He is to be with His disciples "always." How important that is, for as we well know, the inspiration of even the greatest human leader largely goes with him to the grave. The Lord Jesus, on the other hand, is with each one of His children always. What assurance that fact brings to His witnesses for Eligible voters residing within

Society and farmer have a mutual interest in the land. They share the responsibility of its productivity. In the past, however, society and the farmer have been unable to enter fully and freely into such a partnership. The mechanism for doing so has been lacking. Now, however, Alabama, and a large majority of the other states have enacted state soil conservation.

## **GETS ENOUGH POTASH**

PROFITS from cotton dwindle when the crop cannot get enough potash. Cotton rust is potash starvation. Decreased yields, more wilt injury, and poor quality lint and fiber result when soil and fertilizer do not supply plenty of this important plant food. Experimental work has shown that the value of the crop can be reduced as much as \$25 per acre due to lack of potash.

A recommended application at planting time is 400-600 pounds, per acre, of a fertilizer containing 4-10% potash. At chopping time, more can be added in a nitrogenpotash top-dresser containing the equivalent of 50-100 pounds of muriate of potash.

Ask your county agent or experiment station how much potash your soil will supply and how much to add to carry your crop

Who are the best friends of advertising?

The manufacturer? . . . Yes, for advertising gives him a chance to acquaint thousands of people at once with the fine product he has made.

The merchant? . . . Yes, for advertising draws people to his store who might never have known about the outstanding goods he has to sell.

The consumer . . . YOU? . . . Yes, because advertising INFORMS. It tells WHAT, it tells WHERE, it tells WHEN, it tells HOW MUCH. It saves you infinite trouble, and makes life easier, more economical, more satisfying.

Everyone profits from advertising. That's why advertising's friends are many . . . and loyal!
